#PreventPoisoning by keeping cleaners up and away and out of sight from children. If you have questions about safety, call #PoisonHelp anytime – 24/7.

Are your household cleaners locked up, or stored up and away from a child's reach? Cleaners can be poisonous so take steps to prevent this common poisoning risk. That also includes hand sanitizer and other disinfectants being used to reduce the spread of COVID-19.

#PreventPoisoning

Keep your home safe by practicing safe storage: keep household cleaners and products in their original containers and store them up, away, and out of sight of children.

#PreventPoisoning

Protect your family from invisible threats—install carbon monoxide detectors in your home. Carbon monoxide is a colorless gas that doesn't smell but can be very harmful.

#PreventPoisoning

Know your poison center's phone number and keep it in your home and phone. #PoisonHelp

#PreventPoisoning
